

I would like to voice my concern that national FM translator services, such as provided by K-LOVE were to be replaced by LPFM broadcasts. Non-commercial national stations can provide a valuable public service in local communities. In particular, K_LOVE has a meaningful and positive influence in my community by providing positive, uplifting family music and announcements regarding wonderful family events in our community. In many communities, if K-LOVE service was eliminated in favor of LPFM services, there would be no station providing similar services, to the detriment of our communities. Please do not limit the choices available in many communities by eliminating access of national FM translator services in favor of LPFM service.
